Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-18, 23 and 24, the art of record fails to teach or fairly suggest a device capable of dispensing a measured amount of ophthalmic liquid, the device having a body with a cavity, a bore perpendicular to the cavity, a dispensing aperture at a side of the body, a second cavity connected to both the bore and the second cavity; a rotary valve in the transverse bore that includes a third cavity can measure and dispense liquid coming down from the top end of the first cavity, the rotary valve having a first position where the third cavity is in fluid communication with the first cavity, and a second position where the third cavity is rotated to be in fluid communication with the second cavity and liquid in the third cavity may empty into the second cavity; and means for forcing air into the second cavity to expel liquid from the second cavity out of the device through the dispensing aperture.

Regarding claims 19-22 and 25, the art of record fails to teach or fairly suggest a device capable of dispensing a measured amount of ophthalmic liquid, the device having a body with a interior opening, a first cavity in the body located perpendicular to the interior opening, and a dispensing aperture in communication with the first cavity, a manually operated rotary valve in the body that can bring liquid from the interior opening to the first cavity, the valve being operated by means outside the body, the valve rotatable from a first position where the valve is open to the interior opening to a second position where the valve is open to the first cavity; and fluid pressure means for expelling liquid from the first cavity out through dispensing aperture.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
